

How to Order Your Sign

The Photo Catalogue contains our range of emblems in a variety of layouts on a variety of plate shapes. Each emblem is numbered to make ordering easy. You can use these examples as a guide in designing your own sign. Remember that emblems and lettering can be placed anywhere on the plate as long as it fits!

1. Choose the plate shape – Some plate shapes have a **BEVELLED** edge and some have a **FRAMED** edge – they are not interchangeable
2. Choose the emblem (if required). Check that it *appears* to fit onto the chosen plate (we will contact you if there is a problem with the emblem size). The emblem will be painted as in the catalogue, but colouring can be changed on request. We can create new emblems to order.
3. Choose the wording
4. Choose the letter style (either **TIMES ROMAN** or **FOLIO**). The most appropriate sized letters will be used to suit the layout. Please specify if wording *needs* to be a particular size, or if some wording needs to be larger or smaller. All lettering is in UPPER-CASE. Lower-case lettering can be supplied at extra cost.
5. Choose the plate colour - **BRUNSWICK GREEN** or **BLACK** (other colours can be supplied at extra cost)
6. Choose the letter colour - **GOLD, WHITE** or **CREAM** (letters can be painted any other colour at request, no extra cost)
7. Signs take approximately 4-5 weeks to produce
8. Plastic screw-caps are included with the sign (screws are not supplied)
9. The cost of the sign is dependent upon the size of the plate, not what is put on it. Please add a freight cost of \$15 per parcel (for regular sized signs) to anywhere within Australia (the extra large signs e.g. OO3, AA3 will incur extra freight costs)
10. Our signs are individually made by pouring molten metal into sand moulds. This may result in slight irregularities on the surface of the sign. This is not a fault, but an indication of the traditional manufacture of the product
